

Construction Support Services

Radian Generation offers construction support services for solar, wind and energy-storage projects.

No matter what phase developers and constructors are in—preconstruction, notice to proceed (NTP), mobilization, or construction—Radian offers expert technical advisory, compliance, and consulting services. Radian can manage the paperwork, AP/AR and submissions to ensure your projects meet all the requisite regulatory deadlines and hit the guaranteed project milestones.

Developer Support and Advisory Services

Radian Generation’s developer and owner support services during late stage development include:

- » Performance modeling
- » SCADA design analysis
- » Financial AP/AR management
- » ISO new resource registration
- » Regulatory filings
- » NERC GO training and registration

Construction Period Consulting

Radian Generation draws on its regulatory and compliance technical resources and expert staff to provide:

- » Construction management support
- » NERC CIP/cybersecurity
- » SCADA/IT/OT audits
- » Interconnection review
- » ISO compliance (ERCOT, PJM, etc.)
- » NERC GOP coordination

Compliance To Support Construction

Radian Generation's experienced compliance team provides guidance every step of the way, from project planning during development to implementation of new compliance programs and from ongoing compliance management to supporting the successful execution of reliability audits. Radian leverages its regulatory background and industry knowledge to streamline and simplify the process. Its expertise ranges from federal regulatory requirements to those of state and regional transmission organizations. These offerings include:

- » Construction period compliance
- » CAISO NRI support
- » NERC/FERC/MBR filings and compliance
- » NERC program review
- » NERC GO registration
- » ERCOT support

About Radian

Radian Generation was founded in 2013 on the core principle of driving sustainable growth by providing focused and professional asset management solutions for the renewable energy industry. During the formative years of the renewable market, Radian's founders fostered an acute awareness of the need for versatility, continuity and resiliency in a third-party business model for managing projects expected to last for decades. In 2022, Radian expanded to offer industry-leading services for asset management, compliance, cyber security, advisory and software services for solar, wind, and energy storage developers and owners.
