

DON'T GET CAUGHT OFF-GUARD BY NERC STANDARD CHANGES

Utilize our Standards Compliance Intelligence Portal (SCIP) to track upcoming changes to compliance standards and requirements.

2025 AT A GLANCE

Supply Chain Management Changes

Inverter-Based Resources (IBRs) of 20 MVA and above, connected at 60kV, must comply.

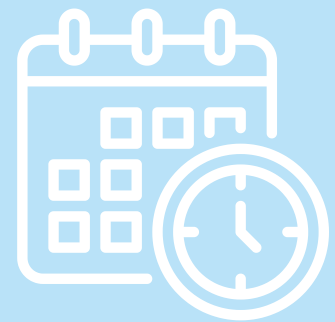

Consulting Expertise

Category 2 is being added to the Generator Operator (GO) and Generator Owner (GOP) definitions, effective May 2025.

CIP Standard Changes

Strengthen security protocols to protect against cyberattacks, with new guidelines in place.

GET PREPARED

Take action now to prevent supply chain disruptions and delays. Assess which standards apply to your facility, set a budget, and plan ahead to ensure compliance is met smoothly and on time.
