

RADIAN DIGITAL

RENEWABLE ENERGY MANAGEMENT SOFTWARE

INDUSTRIAL TRANSFORMATION

Radian Digital is a powerful renewable energy management platform designed for experts to manage every stage of the energy portfolio lifecycle.

Whether you're handling development, construction, or operations, our software centralizes information, optimizes workflows, and enhances team collaboration

KEY BENEFITS

- **Centralized Data:** Unifies project data in one secure platform.
- **Improved Collaboration:** Streamlines workflows for better teamwork.
- **Risk Reduction:** Automates tasks to minimize errors and operational risks.
- **Scalable:** Grows with your portfolio and integrates with other systems.
- **Secure Access:** Ensures safe, controlled sharing of data.

OPTIMIZE EVERY STAGE OF YOUR PROJECT LIFECYCLE

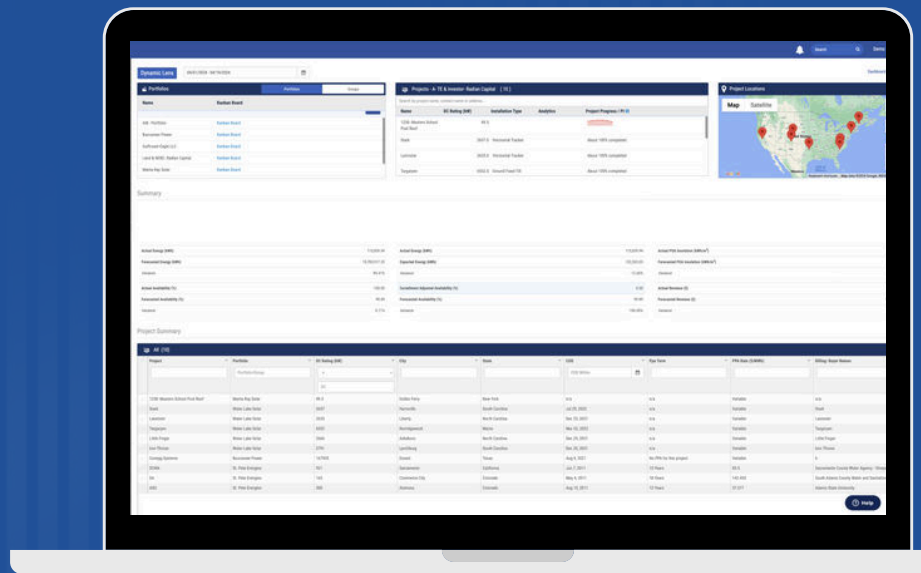

RADIAN DIGITAL PLATFORM

SCALABLE RENEWABLE ENERGY MANAGEMENT

Radian Digital is your all-in-one platform for managing renewable energy projects from early development through to daily operations. By centralizing data, automating critical tasks, and ensuring compliance, our solution empowers your team to work more effectively, reduce risks, and scale with confidence. Each phase of your project's lifecycle is fully supported with tools that simplify complex processes, enabling sustainable growth and operational excellence.

PROJECT DEVELOPMENT

Eliminate the chaos of managing multiple land agreements and project deadlines. Radian Digital brings order to your development pipeline with centralized data, automated workflows, and seamless team coordination. Focus on growth while Radian Digital keeps projects organized, meeting critical deadlines, and maintaining compliance across all project sites.

CONSTRUCTION

Stick to project timelines and within budget. Radian Digital adapts dynamically to project changes, linking budgeting with key milestones and providing real-time risk insights. With automated forecasting and increased visibility, your team can proactively address potential delays and cost deviations, ensuring smooth project execution from start to finish.

OPERATIONS & MANAGEMENT

Maximize performance and minimize downtime with Radian Digital's unified approach to asset management. Our platform empowers data-driven decision-making and streamlines maintenance scheduling, enhancing operational efficiency. From proactive upkeep to robust analytics, Radian Digital keeps your assets reliable, compliant, and profitable.

WHY CHOOSE RADIAN DIGITAL?

CHALLENGE

Siloed Data & Manual Processes

Project data is often spread across different platforms, causing inconsistencies, slowing down decision-making, and increasing risks.

Error-Prone Spreadsheets

Relying on spreadsheets can lead to multiple versions of important information, which increases the likelihood of errors and reduces accuracy.

Inefficient Data Access

Switching from development to operations often requires data re-entry into multiple systems, leading to delays and the risk of mistakes.

Complex and Insecure Data Sharing

Sharing project data with external partners can be complicated and potentially insecure.

OUR SOLUTION

Consolidate your data into one secure platform for consistency and transparency across all project stages. Centralizing data reduces errors and boosts efficiency by automating workflows and data sharing.

Replace outdated tools with a scalable platform that captures data at the source, minimizing errors, eliminating redundant entry, and improving project workflows.

Ensure seamless data flow throughout the project lifecycle, capturing data in real-time to enhance decision-making and eliminate inefficiencies from manual re-entry.

Securely manage access to project information through a role-based access system, protecting sensitive data while facilitating collaboration with external stakeholders.
